About the Venue (Jeju Island)

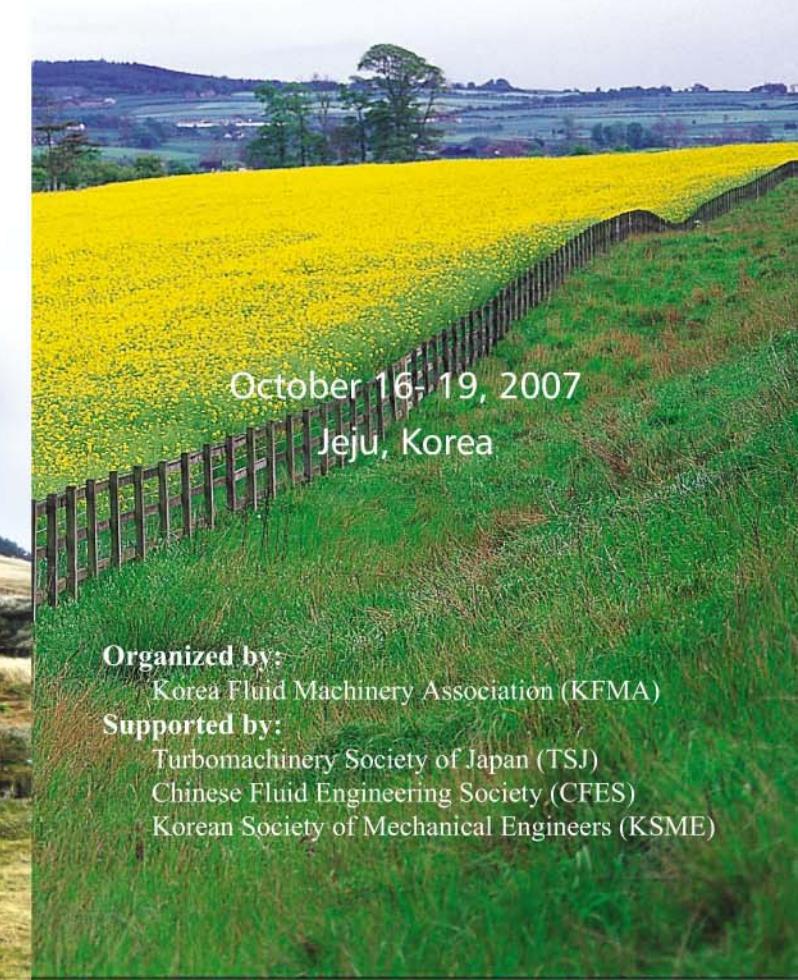

Jeju Island, which is located in the southwest sea of the Korean peninsula, is a popular holiday spot. The island's mixture of volcanic rock, frequent rains, and temperate climate, renders it very similar to the Hawaiian Islands in the U.S. The island offers visitors a wide range of activities: hiking on Mt. Halla (South Korea's highest peak), catching sunrises and sunsets over the ocean, viewing waterfalls, riding horses, playing golf, or just lying on the beaches.

About the Conference

This conference is a continuation of the preceding eight conferences that have been held in the name of Asian International Conference on Fluid Machinery. It has developed from the fourth conference (1993) as an Asian International Conference though the start was held in two countries of Japan and China. The fifth to eighth conferences were held in Seoul (1997), Johor Bahru (2000), Fukuoka (2003) and Yichang (2005).

At the conference, keynote lectures delivered by worldwide renowned fluid machinery specialists will be made to introduce the outstanding achievements in various fluid machinery areas; for examples, fans and blowers, compressor, pumps, gas and steam turbines, and so on.

This time, the conference will be held in the wonderful resort island of Korea, Jeju, during October 16-19, 2007. This conference is organized by the Korean Fluid Machinery Association and will be supported by major societies inside the Asian region. Participation of those who are relevant to every facet of fluid machinery R&D will be much encouraged.

Scope

Papers dealing with all aspects of various fluid machines are welcome, especially in the areas of

- Cavitation
- Compressors
- Fans and blowers
- Flow meters and valves
- Fluid sealing
- Gas and steam turbines
- General fluid dynamics of fluid machinery
- Hydro turbines
- Jet technology
- Monitoring & Diagnosis

THE 9TH ASIAN INTERNATIONAL CONFERENCE ON FLUID MACHINERY
Final Program

Welcome to AICFM-9

Dear Colleagues,

On behalf of the organizing committee, I have great pleasure in holding the Ninth Asian International Conference on Fluid Machinery (AICFM-9) in Jeju, Korea, Oct. 16-19, 2007, which is organized by Korean Fluid Machinery Association (KFMA).

About 300 papers are expected to be presented at AICFM-9. This is very successful result reflecting the recent development of Asian fluid machinery society, comparing with the recent AICFM conferences. At this conference, we will have also special workshop on energy conversion technology in industrial fluid machinery, in which fluid machinery industries may have interest. I hope AICFM-9 to provide not only the forum to exchange technologies about fluid machinery, but also the opportunity to promote friendly relations among Asian countries. The success of the conference is dependent on the active participation of the experts in the area of fluid machinery regardless of paper presentation.

You are welcome to AICFM-9, which will be held in the beautiful island of Jeju. I believe that AICFM-9 will be the cornerstone to open a new era in history of Asian fluid machinery society.

I am looking forward to meeting you at AICFM-9 in October.

Sincerely Yours

Kwang-Yong KIM
Chairman of AICFM-9 Organizing Committee
Professor, Inha University, Korea
